INTRODUCTION

The School of Library & Information Science is dedicated to developing competent and innovative information professionals capable of serving the needs of modern libraries, digital knowledge centres, and information organizations. The School provides quality education and practical training in the areas of library management, information organization, digital libraries, knowledge management, research support services, and information technology applications.

Currently, the School offers three professional programmes: Diploma in Library & Information Science (DLIS), Bachelor of Library & Information Science (BLIS), and Master of Library & Information Science (MLIS). These programmes are designed to meet the growing demands of the knowledge-driven society by integrating traditional library science principles with modern digital technologies.

Students gain expertise in cataloguing, classification, library automation, information retrieval, e-resource management, documentation services, digital archiving, and database management. The curriculum focuses on both theoretical knowledge and practical skills required in today's rapidly evolving information environment.

The School emphasizes academic excellence, research, innovation, and professional development through workshops, seminars, internships, and hands-on learning experiences under the guidance of experienced faculty members. It also promotes critical thinking, ethical values, leadership qualities, and lifelong learning among students.

With a strong commitment to technology-driven and user-oriented information services, the School prepares graduates for successful careers in academic institutions, research organizations, public libraries, archives, corporate sectors, and digital information industries, thereby contributing significantly to the advancement of knowledge and society.

OBJECTIVES

The Internship Programme aims to achieve the following objectives:

- ▶ To provide hands-on practical exposure to library operations and services in real working environments.
- ▶ To develop professional competencies in core areas such as cataloguing, classification, circulation, and reference services.
- ▶ To familiarize students with modern library technologies, automation systems, and digital library platforms.
- ▶ To enhance skills in information retrieval, database searching, and user assistance services.
- ▶ To provide experience in managing different types of libraries such as academic, public, special, and digital libraries.
- ▶ To develop problem-solving abilities and decision-making skills in routine library operations.
- ▶ To enable students to understand collection development, organization, and management practices.
- ▶ To strengthen documentation, report writing, and presentation skills through the preparation of an internship report.

VISION

To be a center of excellence in library and information science education, research, and innovation, dedicated to developing competent, ethical, and technologically proficient information professionals who contribute meaningfully to knowledge society, lifelong learning, and global information access.

MISSION

- ▶ To provide high-quality education in library and information science that integrates theory, practice, and emerging technologies.
- ▶ To foster critical thinking, ethical values, and leadership among students to meet the dynamic needs of libraries, information centers, and knowledge-based industries.
- ▶ To promote research, innovation, and community engagement in the field of library and information science.
- ▶ To prepare information professionals capable of managing, organizing, and disseminating information effectively for the benefit of society.
